

# Veronica arvensis

## COMMON NAME

field speedwell, corn speedwell

## FAMILY

Plantaginaceae

## AUTHORITY

*Veronica arvensis* L.

## FLORA CATEGORY

Vascular – Exotic

## STRUCTURAL CLASS

Herbs - Dicotyledons other than Composites

## NVS CODE

VERARV

## CONSERVATION STATUS

Not applicable

## HABITAT

Open rocky area, waste ground, cultivated areas, fields, pastures, lawns, roadsides and rail corridors.

## DETAILED DESCRIPTION

Stems erect, decumbent, or sprawling, multiple from fibrous roots, to +/-15cm tall, herbaceous, hollow, villous. Leaves are opposite, petiolate below, sessile above, broadly ovate to triangular above, to +/-1cm long, 1cm broad, crenate-serrate, pubescent. Inflorescence produced on a terminal bracteate raceme to +/-5cm long. Bracts foliaceous and giving the flowers a single axillary look. Flowers sessile or on petioles to -1mm long. Corolla deep blue-purple, to 5mm broad. Petals 4, united at the base to form a short tube to .5mm long. Lobes of the corolla rounded. Stamens 2, erect, adnate at the base of the corolla tube. Filaments whitish, glabrous, to 1mm long. Anthers bluish and white, .3-.4mm long. Ovary superior, green, orbicular, compressed, pubescent on the margins, .5mm in diameter. Style whitish-green, -1mm long and glabrous. Calyx accrescent, deeply 4-lobed, glandular and simple hispid. Lobes oblong, typically unequal, green, rounded to subacute, to 2mm in flower (much longer in fruit). Calyx tube short, -1mm long.

## FLOWER COLOURS

Blue, Violet/Purple

## YEAR NATURALISED

1864

## ORIGIN

Temperate Eurasia, N. Africa, Micronesia

## ETYMOLOGY

**veronica:** Named after Saint Veronica, who gave Jesus her veil to wipe his brow as he carried the cross through Jerusalem, perhaps because the common name of this plant is 'speedwell'. The name Veronica is often believed to derive from the Latin vera 'truth' and iconica 'image', but it is actually derived from the Macedonian name Berenice which means 'bearer of victory'.

**arvensis:** Growing in arable fields
