

Arisaema taiwanense

COMMON NAME

Taiwan cobra lily, Jack-in-the-pulpit

FAMILY

Araceae

AUTHORITY

Arisaema taiwanense J. Murata

FLORA CATEGORY

Vascular – Exotic

STRUCTURAL CLASS

Monocotyledonous Herbs

CONSERVATION STATUS

Not assessed

BRIEF DESCRIPTION

Leaves and the flowering stem arise from a pseudostem; leaves described as "... solitary; petiole 10-40 cm long, usually longer than the pseudostem; lamina radiately 7-15-foliolate" (Jenn-Che Wang 1996); petiole green and purple spotted. Flowers minute, on a spadix surrounded by a purple-black spathe.

DISTRIBUTION

Uncommon in NZ gardens

SIMILAR TAXA

There are other *Arisaema* and related aroids, such as *Arisarum* (q.v.) in cultivation in NZ.

FLOWER COLOURS

Black, Purple

FRUITING

Sets seed in NZ gardens

LIFE CYCLE

Self-seeding in NZ

PROPAGATION TECHNIQUE

Seed or division

YEAR NATURALISED

2010 (1st record was near Fordell, Whanganui)

ORIGIN

Taiwan

REASON FOR INTRODUCTION

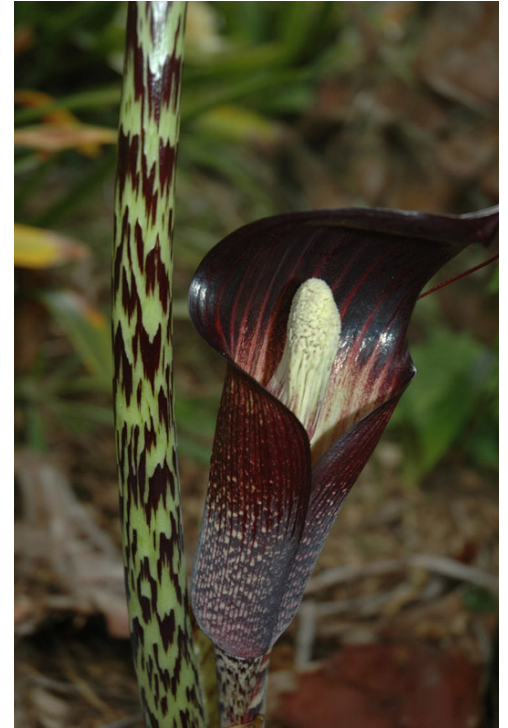

Ornamental

ATTRIBUTION

Fact sheet prepared by Colin C Ogle, 14 Oct 2016
