

Baccharis halimifolia

COMMON NAMES

baccharis

BIOSTATUS

Exotic

CONSERVATION STATUS

Not applicable

CATEGORY

Vascular

STRUCTURAL CLASS

Trees & Shrubs - Dicotyledons

FLOWER COLOURS

Green, White

GENUS

Baccharis

FAMILY

Asteraceae

AUTHORITY

Baccharis halimifolia L.

ENDEMIC FAMILY

No

FLOWERING

February, March, April, May

YEAR NATURALISED

1975

ORIGIN

E. North America

ETYMOLOGY

baccharis: Named after Bacchus, the Greek god of wine, the spicy extract of this plant has been mixed in wine

ENVIRONMENTAL WEED (2024)

This plant is named in a list of 386 environmental weeds in New Zealand 2024 prepared by DOC. 759 candidate species were considered for inclusion on this new comprehensive list of environmental weeds in New Zealand. The species considered were drawn from published lists of weed species, lists of plants that must be reported or managed by law if observed, existing national and regional programmes and agreements for pest management, and species already managed by the Department of Conservation (DOC). Candidate species were then assessed to see if they were fully naturalised and whether they have more than minor impacts in natural ecosystems. Read the full report [here](#).
