# Iris foetidissima

## **COMMON NAME**

stinking iris

#### **FAMILY**

Iridaceae

#### **AUTHORITY**

Iris foetidissima L.

## **FLORA CATEGORY**

Vascular - Exotic

#### STRUCTURAL CLASS

Herbs - Monocots

#### **NVS CODE**

**IRIFOE** 

#### **CONSERVATION STATUS**

Not applicable

#### **HABITAT**

Terrestrial. A plant of coastal and lowland habitats (Timmins & MacKenzie 1995). A plant of low forest, scrub and forest margin communities, also found in waste places (Timmins & MacKenzie 1995).

#### **DETAILED DESCRIPTION**

Clump-forming perennial to 80 cm. Rhizomes red-brown, up to 15 mm diameter. Leaves leathery, dark greed, broad, sword shaped, 15-25 mm x 60-100 cm, foul smelling when crushed. Flowering stem 60-80 cm, erect. Flowers up to 10 cm diameter, dull yellow with greenish-brown markings (Occasionally brownish-purple). Seed capsule green, 3-sided, 5 cm long, splitting issuing many scarlet round seeds, 5 mm diameter.

# **SIMILAR TAXA**

The leaves have an unpleasant odour when crushed and this is useful in separating I. foetidissima from other Iris species. It can also be recognised by the drab flowers and conspicuous scarlet seeds exposed in the persistent capsule.

## **FLOWERING**

November, December

#### **FLOWER COLOURS**

Brown, Yellow

#### LIFE CYCLE

Perennial, reproduces by seed and vegetatively through rhizomatous resprouting (Timmins & MacKenzie 1995). Seed is dispersed by birds and water(Timmins & MacKenzie 1995).

# YEAR NATURALISED

1945

#### **ORIGIN**

Europe & N Afr

#### **REASON FOR INTRODUCTION**

Ornamental

Iris foetidissima. Photographer: John Smith-Dodsworth, Licence: CC BY-NC.

Iris foetidissima. Photographer: Richard Hursthouse, Licence: CC BY.

#### **TOLERANCES**

The plant prefers high rainfall and is highly tolerant of shade (Timmins & MacKenzie 1995). After grazing the plant resprouts from the rhizome (Timmins & MacKenzie 1995). Requires medium soil fertility (Atkinson 1997).

## **ETYMOLOGY**

**iris**: From the Greek iris 'rainbow', presumably in reference to the many colours of the flowers (Johnson and Smith, 1986).

foetidissima: Vile smelling

#### **POISONOUS PLANT**

The orange seed (which can be seen when the fruits open) are poisonous.
