

Laingia hookeri

BIOSTATUS

Native – Endemic taxon

CATEGORY

Non-vascular

GENUS

Laingia

FAMILY

Delesseriaceae

AUTHORITY

Laingia hookeri (Lyll) Kylin

ENDEMIC TAXON

Yes

ENDEMIC FAMILY

No

ETYMOLOGY

hookeri: Named after Sir Joseph Dalton Hooker (born 1817) - a world famous botanist who travelled on the Antarctic expedition of 1839 under the command of Sir James Ross and wrote "Handbook of New Zealand Flora" published in 1864-67 describing many specimens sent to Kew by collectors. He died in 1911 and has a memorial stone at Westminster Abbey London.
