

# Lamium confertum

## BIOSTATUS

Exotic

## CONSERVATION STATUS

Not applicable

## CATEGORY

Vascular

## STRUCTURAL CLASS

Herbs - Dicotyledons other than Composites

## FLOWER COLOURS

Red/Pink, Violet/Purple

## SIMILAR TAXA

L. Confertum is closely related to L. purpureum var. hybridum (Villars) but this has floral leaves (bracts) all petiolate and with longer, narrower and sharper lobes. The general aspect is also much like L. amplexicaule and it has often been confused here and overseas with this species. However L. amplexicaule has all its floral leaves sessile and amplexicaul and the calyx 5-7 mm long. (Webb et al. 1995)

## GENUS

Lamium

## FAMILY

Lamiaceae

## AUTHORITY

Lamium confertum Fr.

## ENDEMIC FAMILY

No

## YEAR NATURALISED

1964

## ORIGIN

N. Europe, Portugal.

## REASON FOR INTRODUCTION

Ornamental
