

Linum monogynum var. monogynum

FAMILY

Linaceae

AUTHORITY

Linum monogynum G.Forst. var. monogynum

FLORA CATEGORY

Vascular – Native

ENDEMIC TAXON

Yes

ENDEMIC GENUS

No

ENDEMIC FAMILY

No

STRUCTURAL CLASS

Herbs - Dicotyledons other than Composites

NVS CODE

LINMON

CHROMOSOME NUMBER

2n = 84

CURRENT CONSERVATION STATUS

2017 | At Risk – Declining | Qualifiers: DP

PREVIOUS CONSERVATION STATUSES

2012 | Not Threatened

2009 | Not Threatened

2004 | Not Threatened

FLOWER COLOURS

White, Yellow

ETYMOLOGY

linum: Flax

monogynum: United styles

TAXONOMIC NOTES

Further research into the status of *Linum monogynum* var. *chathamicum* is needed. Whilst plants with bluish or blue striped flowers have been found in New Zealand proper, DNA data (Heenan et al. 2010) suggests that Chatham Island plants are distinct. Further research is needed, but until such time as this has been done it seems prudent to retain the Chatham Island *Linum* as distinct from New Zealand plants.
