

# Menyanthes trifoliata

## COMMON NAMES

Bogbean

## BIOSTATUS

Exotic

## CONSERVATION STATUS

Not applicable

## CATEGORY

Vascular

## STRUCTURAL CLASS

Herbs - Dicotyledons other than Composites

## SIMPLIFIED DESCRIPTION

As the common name indicates the plant looks superficially similar to a broad bean, with three lobed leaves held above shallow water by long, fleshy stalks. In summer spikes of white (pinkish) flowers occur above the water

## FLOWER COLOURS

Red/Pink, White

## DETAILED DESCRIPTION

Sprawling emergent perennial herb. Leaves of three leaflets (like the leaves of broad bean) at the end of stems. Leaflets are elliptical to obovate, 3-10 cm long, 1-5 cm wide, entire or sometimes coarsely toothed. Leaves are all basal, with the petiole bases arranged alternately on the creeping stem. Flowers have five petals, pinkish-white in colour, with long white hairs on the top surface. Flowers are about 2.5 cm across. The seed capsule contains shiny yellow-brown buoyant seeds.

## SIMILAR TAXA

None.

## DISTRIBUTION

Nationally eradicated, only known from two sites, Racecourse Hill near Darfield, Canterbury and Queenstown, Otago.

## HABITAT

Only found in an ornamental pond and irrigation race in New Zealand, found in nutrient poor waters in native range.

## GENUS

Menyanthes

## FAMILY

Menyanthaceae

## AUTHORITY

*Menyanthes trifoliata* Tournef.

## ENDEMIC FAMILY

No

## FLOWERING

October - April

## FRUITING

Autumn

*Menyanthes trifoliata*. Photographer: Auckland Regional Council, Licence: Public domain.

*Menyanthes trifoliata*. Photographer: Auckland Regional Council, Licence: Public domain.

## YEAR NATURALISED

1976

## ORIGIN

Native to temperate Northern Hemisphere.

## REASON FOR INTRODUCTION

Ornamental pond plant

## CONTROL TECHNIQUES

Notify the relevant regional council if found

## LIFE CYCLE AND DISPERSAL

Spreads by seeds, stem extension, and fragmentation, Can establish rapidly from stem fragments. Seeds have not been seen in the field in New Zealand.

## WETLAND PLANT INDICATOR STATUS RATING

OBL: Obligate Wetland

Almost always is a hydrophyte, rarely in uplands (non-wetlands).

## NATIONAL PEST PLANT ACCORD SPECIES

**This plant is listed in the 2020 National Pest Plant Accord.** The National Pest Plant Accord (NPPA) is an agreement to prevent the sale and/or distribution of specified pest plants where either formal or casual horticultural trade is the most significant way of spreading the plant in New Zealand. For up to date information and an electronic copy of the 2020 Pest Plant Accord manual (including plant information and images) visit the [MPI website](#).
