

Neophyllis melacarpa

BIOSTATUS

Native

CURRENT CONSERVATION STATUS

2018 | Not Threatened | Qualifiers: SO

CATEGORY

Lichen

STRUCTURAL CLASS

Lichens - Squamulose

LICHEN SUBSTRATES

Terricolous (soil), Corticolous (bark, wood)

SUBSTRATE DETAILS

Terricolous, corticolous (decaying wood).

GENUS

Neophyllis

FAMILY

Cladoniaceae

AUTHORITY

Neophyllis melacarpa (F.Wilson) F.Wilson

SYNONYMS

Gymnoderma melacarpum, Phyllis melacarpa

ENDEMIC TAXON

No

ENDEMIC GENUS

No

ENDEMIC FAMILY

No

NVS CODE

NEOMEL
