

Radula marginata

COMMON NAMES

wairuakohu

BIOSTATUS

Native – Endemic taxon

CURRENT CONSERVATION STATUS

At Risk – Naturally Uncommon

CATEGORY

Non-vascular

STRUCTURAL CLASS

Liverworts

GENUS

Radula

FAMILY

Radulaceae

AUTHORITY

Radula marginata (Hook.f. & Taylor) Gottsche, Lindenb. & Nees

ENDEMIC TAXON

Yes

ENDEMIC GENUS

No

ENDEMIC FAMILY

No

Newly discovered cannabinoid properties have been discovered for potential commercialisation of bio-based products - read [article](#) here.

ETYMOLOGY

marginata: From the Latin marginatus 'edge, margin', where one colour is surrounded by a very narrow rim of another
