

1. Pigeonwood - broadleaved spp. forest.
2. Pukatea / tawa - mahoe forest.
3. Kanuka scrub.
4. Mixed shrubs / bracken grassland.
5. Bracken fernland.
6. Lupin - grasses.
7. Tall fescue sedges.

Vegetation types 1 and 7  
grading into each other.

## Himatangi Bush Scientific Reserve

Area: 18.76 ha

<b>HIMATANGI BUSH SCIENTIFIC RESERVE</b>								<b>GRID REF</b> M148 307 156	
<b>for:</b>	scenery	bush	scrub/tussock etc	wetland	plants	animals	geology/soil	history/prehistory	natl. rep.
<b>LOCATION</b> At junction of Paranui Road and Motuiti Road, 10 km NE Foxton.								<b>AREA</b> ha/ha x 18.7627	
<b>ACCESS</b> Along Paranui Road off SH 1 or from Motuiti Road.								<b>L.D. No.</b>	
<b>OUTLINE &amp; TOPO</b> Small area of semi-swamp and dune forest on Manawatu sand dune country.								<b>STATUS</b> Scientific	
								<b>RES sub-Ctee</b>	
								<b>CONTROL</b> CCL	
								<b>GAZETTED</b> 1976	
								<b>RESERVED</b> 1971	
								<b>HISTORY</b> Kahikatea milled in 1930s. Fenced in 1972.	
<b>SURROUNDINGS</b> Pastureland.								<b>AIR PHOTO</b> date	
<b>GEOLOGY</b> Flats in the eastern portion of the reserve and a central low dune derived from coastal sands of the Foxton dune-building phase (3000 yrs bp). Western portion of reserve derived from sands of Motuiti dune-building phase (500 years bp).								<b>nearby town</b> 10 km Foxton <b>nearest reserve</b> 8 km Round Bush <b>public road</b> 0 km <b>sea (km)</b> 10

		1. Mixed broadleaved forest with pigeonwood, kaikomako, rewarewa and tawa contributing to the canopy cover along with one or two trees of white maire, lancewood, and red matipo present. Canopy height is uneven, reaching up to 15m at the bottom of the dune and grading into a low shrub forest on the crest of the dune with kohuhu, ngaio and mahoe in the canopy. There is an open understorey of kawakawa, mahoe and Coprosma species up to 2m. Ground cover is sparse with a few clumps of <i>Peltophorum peltatum</i> , shieldfern and the grass <i>Oplismenus</i> .							
		2. Tall misshapen pukatea (up to 30m) rise above an uneven canopy (up to 15m) of tawa and mahoe on the wet flats. Kiekie and epiphytes festoon the pukatea trees and supplejack is common. There is an open understorey of kawakawa, hangehange, mahoe and <i>Coprosma areolata</i> in places. The ground floor vegetation is still recovering from years of cattle grazing and is dominated in the drier places by <i>Oplismenus</i> and a number of introduced herbs and in the wetter places by <i>Carex</i> species. There are more open areas of semi-swamp forest at the eastern ends of the forests where scattered young kahikatea occur with cabbage trees, <i>Coprosma areolata</i> and kaikomaka.							
		3. Clumps of kanuka up to 6m occur on the western dunes of the reserve and also are present on the northern dune. Associated species with the kanuka are mahoe, kohuhu, lancewood and five finger.							
		4. The central low dune running between the two areas of semi-swamp forest is dominated by bracken and exotic grasses with a number of emergent shrubs including tree lupin, gorse, lacebark, kohuhu, mahoe, <i>Melicope simplex</i> and kaikomako.							
		6. Exotic grasses, mainly Yorkshire fog, cocksfoot, tall fescue and marram occur on the dunes and the dry flats along with bracken and lupin and scattered plants of mahoe, five finger, <i>Coprosma rhamnoides</i> , and tangles of pohuehue and <i>Clematis</i> species.							
		7. Tall fescue, <i>Carex secta</i> and <i>Cyperus ustulatus</i> dominate the wet flats of the eastern boundary of the reserve.							
<b>CONDITION</b> The reserve is now showing signs of recovery after a history of abuse from milling and cattle grazing prior to reservation.									
<b>FENCING</b> Good, but one cattle beast was in reserve at time of visit.									
<b>PRIORITY</b> Fences must be maintained.

<b>CONCLUSIONS and RECOMMENDATIONS</b>									
A very important reserve preserving one of the last remnants of sand-country forest in the Manawatu. One of the few forest areas in the world where different soil surfaces of known age are reserved.									
The forest was probably not greatly disturbed until the early 1930's when large kahikatea were removed and the tall pukatea became exposed to the wind. Cattle had access to the reserve until the 1970's and over a forty year period the condition of the forest deteriorated; clearings developed in the forest, trees around the periphery died and much of the understorey and ground flora was destroyed. Regeneration is now occurring and is most marked on the central dune where mahoe shrubs are appearing through the bracken and inside the forest where broadleaved shrubs are beginning to establish in the understorey.									
The history and botanical features of the reserve were documented in 1979 by Esler, Greenwood and Atkinson. They also established permanent plots in the reserve and undertook plantings of shrub species on the bracken and grass covered dunes and flats in the northern part of the reserve.

<sup>1</sup> tall conifer: kahikatea, kauri, matai, miro, rimu, totara

<sup>2</sup> remaining 11 tree-sized spp

<sup>3</sup> broadleaved

<sup>4</sup> e.g. flax

<sup>5</sup> incl. rough grassland, pasture etc

## TREES AND SHRUBS

### Native

*Alectryon excelsus*  
*Aristotelia serrata*  
*Beilschmiedia tawa*  
*Carmichaelia arborea*  
*Carpodetus serratus*  
*Coprosma areolata*  
*C. crassifolia*  
*C. grandifolia*  
*C. propinqua*  
*C. rhamnoides*  
*C. rigida*  
*C. rotundifolia*  
*C. propinqua* X *C. robusta*  
*Cordyline australis*  
*Corynocarpus laevigatus*  
*Dodonaea viscosa*  
*Elaeocarpus dentatus*  
*E. hookerianus*  
*Geniostoma rupestre* var.

*Griselinia lucida*  
*Hebe stricta* var. *stricta*  
*Hedycarya arborea*  
*Hoheria populnea* var. *lanceolata*  
*Knightia excelsa*  
*Laurelia novae-zelandiae*  
*Leptospermum ericoides*  
*L. scoparium*  
*Leucopogon fasciculatus*  
*Lophomyrtus bullata*  
*L. obcordata*  
*Macropiper excelsum*  
*Melicope simplex*  
*Melicytus micranthus*  
*M. ramiflorus*  
*Mida salicifolia*  
*Myoporum laetum*  
*Myrsine australis*  
*Nestegis lanceolata*  
*Olearia solandri*

*Tearia virgata*  
*Paratrophis microphylla*  
*Pennantia corymbosa*  
*Pittosporum cornifolium*  
*P. eugeniooides*  
*P. tenuifolium*  
*Podocarpus dacrydioides* (*Dacrycarpus*  
 = *dacrydioides*)  
*P. ferrugineus* (= *Prumnopitys*  
*taxifolia*)  
*P. totara*  
*Pseudopanax arboreus*  
*P. crassifolius*  
*Rhopalostylis sapida*  
*Schefflera digitata*  
*Solanum aviculare*  
*Sophora microphylla*  
*Syzygium maire*  
*Urtica ferox*

### Adventive

*Chamaecytisus palmensis*

*Ulex europaeus*

*Lupinus arboreus*

## CLIMBERS, LIANES ETC.

### Native

*Clematis foetida*  
*C. forsteri*  
*C. paniculata*  
*Freylinetia baueriana* ssp. *banksii*  
*Fuchsia perscandens*  
*Metrosideros colensoi*

*Metrosideros diffusa*  
*M. perforata*  
*Parsonsia capsularis* var. *capsularis*  
*P. heterophylla*  
*Passiflora tetrandra*

*Ripogonum scandens*  
*Rubus australis*  
*R. cissoides*  
*R. schmideliooides*  
*R. squarrosus*

## GRASSES, RUSHES AND LIKE PLANTS

### Native

*Agropyron scabrum*  
*Carex dipsacea*  
*C. dissita*  
*C. geminata*  
*C. secta*  
*C. solandri*  
*C. testacea*  
*C. virgata*

*Cyperus ustulatus*  
*Echinopogon ovatus*  
*Gahnia xanthocarpa*  
*Juncus australis*  
*J. pallidus*  
*J. sarophorus*  
*Luzula picta*

*Microlaena avenacea*  
*M. stipoides*  
*Oplismenus imbecillus*  
*Rytidosperma racemosum*  
*Scirpus inundatus*  
*S. nodosus*  
*Uncinia uncinata*

### Adventive

*Agrostis stolonifera*  
*A. tenuis*  
*Ammophila arenaria*  
*Anthoxanthum odoratum*

*Bromus catharticus*  
*B. diandrus*  
*Cyperus eragrostis*

*Dactylis glomerata*  
*Festuca arundinacea*  
*Holcus lanatus*

## HERBS

### Native

*Acaena novae-zelandiae*  
*Acianthus fornicatus* var. *sinclairii*  
*Callitricha muelleri*  
*Cardamine debilis*  
*Chiloglottis cornuta*  
*Collospermum hastatum*  
*Corybas trilobus*  
*Earina autumnalis*  
*E. mucronata*  
*Gastrodia cunninghamii*

*Geranium potentilloides*  
*Gnaphalium gymnocephalum*  
*Haloragis erecta*  
*Hydrocotyle moschata*  
*H. novae-zelandiae*  
*Microtis unifolia*  
*Parietaria debilis*  
*Pratia angulata*  
*Pterostylis banksii*

*Ranunculus hirtus*  
*R. rivularis*  
*Senecio biserratus*  
*S. hispidulus*  
*S. minimus*  
*Solanum nodiflorum*  
*Stellaria parviflora*  
*Urtica incisa*  
*Wahlenbergia gracilis*

### Adventive

*Achillea millefolium*  
*Arctium minus*  
*Cerastium fontanum*  
*Cirsium arvense*  
*C. vulgare*  
*Lactuca serriola*  
*Lotus pedunculatus*

*Myosotis caespitosa*  
*Plantago lanceolata*  
*Ranunculus repens*  
*Conyza sp.*  
*Fumaria muralis*  
*Galium aparine*  
*G. palustre*

*Hypochaeris radicata*  
*Rumex acetosella*  
*Senecio bipinnatisectus*  
*Taraxacum officinale*  
*Trifolium repens*  
*Vicia hirsuta*

## FERNS AND ALLIES

### Native

*Alsophila tricolor* (= *Cyathea dealbata*)  
*Asplenium bulbiferum*  
*A. flabellifolium*  
*A. flaccidum*  
*A. oblongifolium*  
*A. polystichoides*  
*Blechnum filiforme*  
*B. sp. (capense agg.)*  
*Ctenitis decomposita*  
*Dicksonia squarrosa*

*Diplazium australe*  
*Histiopteris incisa*  
*Hymenophyllum rarum*  
*Hypolepis tenuifolia*  
*Lastreopsis glabella*  
*L. hispida*  
*L. microsora* ssp. *pentangularis*  
*Lycopodium varium*  
*Paesia scaberula*  
*Pellaea rotundifolia*

*Phymatosorus diversifolius*  
*P. scandens*  
*Pneumatopteris pennigera*  
*Polystichum richardii*  
*Pteridium esculentum*  
*Pteris macilenta*  
*P. tremula*  
*Pyrrosia serpens*  
*Sphaeropteris medullaris*
