

Veronica scutellata

COMMON NAME

marsh speedwell

FAMILY

Plantaginaceae

AUTHORITY

Veronica scutellata L.

FLORA CATEGORY

Vascular – Exotic

STRUCTURAL CLASS

Herbs - Dicotyledons other than Composites

NVS CODE

VERSCU

CONSERVATION STATUS

Not applicable

BRIEF DESCRIPTION

Sprawling perennial herb up to 30 cm tall with opposite narrow stalkless leaves and small (c.1 cm across) white flowers.

DISTRIBUTION

Found locally in Thames, Waikato, Manawatu, Wairarapa, Canterbury, Dunedin and the West Coast.

HABITAT

Shallow water, swamps and margins of waterways.

WETLAND PLANT INDICATOR STATUS RATING

OBL: Obligate Wetland

Almost always is a hydrophyte, rarely in uplands (non-wetlands).

DETAILED DESCRIPTION

Glabrous herb with upright stems c.5 to 20 cm in length. The leaves are sessile, entire or sparsely toothed 2-6 cm x 0.1-1.2 cm. The flowers are in racemes that are slender and spreading, alternating in opposite pairs of leaves. Flowers are small (6mm across), and whitish in colour with purple veins. Capsule 3-4.5 mm wide.

SIMILAR TAXA

Distinguished by its alternate flower stalks, linear leaves and white flowers with purple veins.

FLOWERING

Summer to autumn

FLOWER COLOURS

Violet/Purple, White

FRUITING

Autumn

YEAR NATURALISED

1924

ORIGIN

Temperate Eurasia

REASON FOR INTRODUCTION

Probably a soil seed contaminant or contaminant of ornamental pond plants.

CONTROL TECHNIQUES

Not controlled in New Zealand.

ETYMOLOGY

veronica: Named after Saint Veronica, who gave Jesus her veil to wipe his brow as he carried the cross through Jerusalem, perhaps because the common name of this plant is 'speedwell'. The name Veronica is often believed to derive from the Latin vera 'truth' and iconica 'image', but it is actually derived from the Macedonian name Berenice which means 'bearer of victory'.
