

Pomaderris aspera

COMMON NAMES

hazel pomaderris

FAMILY

Rhamnaceae

AUTHORITY

Pomaderris aspera DC.

FLORA CATEGORY

Vascular – Exotic

STRUCTURAL CLASS

Trees & Shrubs - Dicotyledons

CONSERVATION STATUS

Not applicable

FLOWER COLOURS

Cream

YEAR NATURALISED

1961

ORIGIN

S.E and S. Australia

ETYMOLOGY

pomaderris: Lid skin

aspera: From the Latin asper 'rough', meaning rough or covered with hard short rigid points

ENVIRONMENTAL WEED (2024)

This plant is named in a list of 386 environmental weeds in New Zealand 2024 prepared by DOC. 759 candidate species were considered for inclusion on this new comprehensive list of environmental weeds in New Zealand. The species considered were drawn from published lists of weed species, lists of plants that must be reported or managed by law if observed, existing national and regional programmes and agreements for pest management, and species already managed by the Department of Conservation (DOC). Candidate species were then assessed to see if they were fully naturalised and whether they have more than minor impacts in natural ecosystems. Read the full report [here](#).
